**To Whom It May Concern**

Full Tilt Constructions recently completed a redevelopment of our site at 107 Dunheved Circuit, St Marys (in the Dunheved industrial area).

Full Tilt were engaged to construct a 1,500m<sup>2</sup> warehouse extension and new office using concrete panels constructed on site. The site now consists of a steel warehouse (including overhead cranes), offices and awnings covering 4,000m<sup>2</sup> on 8,000m<sup>2</sup> of land.

We chose Full Tilt as their values were aligned to ours as they had a high regard for quality in all aspects of the construction.

Our redevelopment was complex and included many challenges including poor access and sharing the site with two occupants who had to continue operating during construction. Further the project had a tight schedule. Full Tilt were successful in completing the job without exceeding the time frame quoted. Full Tilt staff were always flexible and focused on getting the job done.

Full Tilt also assisted with pre-construction management in obtaining the Construction Certificate necessary.

I would have no hesitation in recommending Full Tilt Constructions for any Commercial or Industrial building project.

Yours faithfully,

Ian Luscombe  
**Director**
